

These are best suited for new build projects, where an aged appearance is not needed.

They are an alternative to the weathered version (where a newer look might be best suited).

These are professionally hand made to the highest possible standards, coming in various sizes with fresh shades of natural colours in the tile itself, giving it a new natural stone appearance; they are made to look like a semi-weathered stone tile.

The tile itself is profiled on the face as well as down the sides and over the front; this gives it its natural look.

The tiles range in size from an 8" x 4" (being the smallest) up to a 22" x 20" tile (being the largest). This gives the roof the diminishing effect.

We also manufacture the Ridge, Hip and Vent Ridge to suit the tile. We can provide full Technical Specifications on request.
