

Universal Ventilated Dry Ridge Kit. This Kit Offers Mortar-free Fixing.

Simple and Fast Mechanical Fixing of the majority of Concrete and Clay Ridge and hip tiles
(Please note: Hip Trays are required for Hip Installation - These are not Included in this Kit.)
This kit fixes the ridge tile securely, while resisting water ingress and allowing the roof to breath.

The ventilated Ridge Roll provides the equivalent of a **5mm continuous airflow** and it's malleable, crimped aluminium skirt with

flexible ridge tile Unions

are the key components that make this kit so effective - together, they offer

long term security

with a

quality water seal

.
